Manual monitoring of multiple pieces of equipment in a large facility is time-consuming and unreliable. Wouldn't it be nice to have an automated monitoring and warning system right on your mobile device?

" Now I can see what my equipment is doing! I can be notified before there is a problem! "

BWR Innovations Dashboard
Cloud-based Wireless Monitoring and Notification System

PERFECT SOLUTION FOR:

Instant Remote Access to Your Data, Provide Safety Compliance Records, Ensure Peak Equipment Efficiency, Reduce Time Consuming Manual Monitoring, Reduce Expensive Product Loss, Reduce Repeated Human Error

The BWR Innovations Dashboard is a superior monitoring system for ALL your critical data monitoring needs, offering:
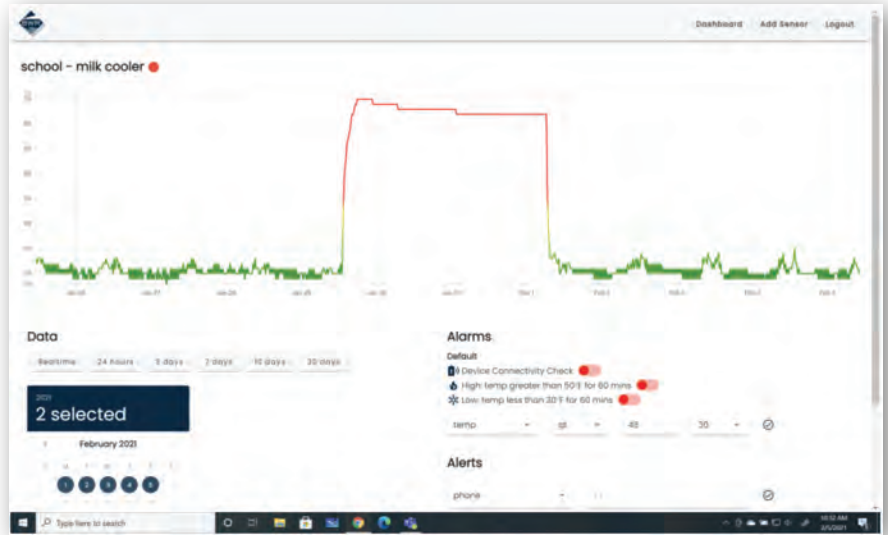

- Low-cost subscription fees
- Receive on-screen alerts & notifications
- Machine learning & diagnostics
- Access information on any browser

- View data in past history reports
- Permission-based access control
- Send alerts & notifications to multiple users by email or SMS text
- Configure the specific reports you need

ONLINE DASHBOARD WITH EASY TO READ HISTORICAL DATA!

iNsite ioT ™

Information available to you 24/7/365.

The **BWR Innovations Dashboard** Monitoring System is the perfect solution for a secure cloud-based, wireless monitoring and notification system that saves you time and money and also gives you peace of mind. Visit with us TODAY!

The **BWR Innovations Dashboard** Monitoring System allows you to remotely monitor temperature, humidity, or other critical data from any of the **BWR Innovations** and **iNsite ioT** products.

The Online Dashboard will measure, record and monitor your equipment. Your equipment outputs important information, and the **BWR Innovations Dashboard** will help you measure, record and monitor the data in real-time, all accessible from your smartphone, tablet, or computer.

A low-cost subscription to connect the **BWR Innovations Dashboard** will provide you with alerts and notifications, allowing you to monitor your equipment.
